

HUMERA MANJRA

[LinkedIn](#) · [/in/humeramanjra](#)

Front-end developer with experience in designing and developing responsive web application using React, JavaScript, HTML, and CSS.

EXPERIENCE / PROJECTS

APRIL 2022 – PRESENT

FRONTEND DEVELOPER, MIRECIPEBOOK

- Designed, developed, and maintained responsive web application for publishing recipes using React, JavaScript, HTML, and SCSS.
- Implemented intuitive user interaction component for the application to allow users to provide feedback for individual recipes.
- Integrated the application with several APIs to allow users to explore and save recipes from other recipe providers.

MAY 2021 – JAN 2022

FRONTEND DEVELOPER, SAJBOUTIQUE

- Designed, developed, and maintained responsive e-commerce web application for a local clothing store using React, JavaScript, HTML, and SCSS.
- Implemented search and filter functionality for the online store to allow users to find products easily and intuitively in store's collection.
- Integrated application with Google analytics to collect user metrics and enhance user experience.
- Built dashboard for the application to easily manage store inventory and promote products to users.
