Experience

Frontend Engineer, Speers Pharmacy

April 2022 – Present

- Designed and developed a user-friendly web application for a local pharmacy using React, JavaScript, MUI, Recoil, and Vite.

- The web application features online prescription ordering, refilling, product showcasing, and consultation booking.

- Employed best practices for responsive design to improve the overall user experience across mobile devices.

- Currently working part-time on maintenance of the website as well as providing necessary technical assistance to pharmacy staff and customers.

Frontend Engineer (Contract), SajjBoutique

June 2021 – Dec 2021

- Designed, developed, and maintained responsive e-commerce web application for a local clothing store using React, JavaScript, HTML, CSS and SCSS.

- Implemented search and filter functionality for the online store to allow users to find products easily and intuitively in store's collection.

- Integrated application with Google analytics to collect user metrics and enhance user experience.

- Built dashboard for the application to easily manage store inventory and promote products to users.

Frontend Engineer (Contract), Creamy Creations

Dec 2020 – March 2021

- Designed, prototyped, developed, and maintained a mobile-friendly web application for a local bakery to showcase collection with a user-friendly photo gallery.

- Engaged with client for suggestion and feedback throughout the development cycle.

- Application was developed using React, JavaScript, HTML, and SCSS and was end-to-end tested using Selenium.

Education

Certified Tester Foundation Level (CTFL), ISTQB
September 2020

Diploma in Computer Engineering, Jamia Polytechnic
July 2008
